

ZUBEDA YASMEEN

SOFTWARE ENGINEER

[LinkedIn](#) | [GitHub](#) | [Leetcode](#) | Mysuru, Karnataka, India | +91-8618368806

PROFILE

Computer Science Engineering student with hands-on experience in software development, cloud technologies, AI-based applications, and collaborative technical projects. Skilled in Java, Python, Git/GitHub, AWS services, APIs, debugging, and problem-solving. Experienced in building scalable project workflows through hackathons, developer communities, and cloud-based implementations. Passionate about backend engineering, AI systems, and writing clean, maintainable code for real-world applications.

SKILLS

Programming Languages: Java, Python, C, HTML, CSS.

Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, Debugging, Git & GitHub, REST API Basics, Software Development Workflows.

Cloud & Tools: AWS EC2, AWS S3, AWS IAM, AWS VPC, AWS PartyRock, Linux, Networking Fundamentals, Web Hosting & Deployment.

Additional Skills: Problem Solving, Team Collaboration, Analytical Thinking, Technical Communication, Analytical Thinking, Community Management.

EDUCATION

B.E. in Computer Science and Engineering – Mysuru Royal Institute of Technology, Mandya *Expected 2027*
CGPA: 8.96

PCMC (Class XII) – Akash International PU College, Hosapete, Karnataka *2023*
84.2%

Class X – Taha English Medium High School, Hosapete, Karnataka *2021*
87% | *Top 3 in School*

PROJECTS

AI-Based Mood & Sentiment Analysis Platform *In-Progress*

March 2026 – Present

- Developing an NLP-based application to analyze mood and sentiment from user text inputs
- Implementing sentiment classification techniques for emotional insight generation
- Designing a responsive interface to improve user interaction and engagement
- Applying debugging, testing, and iterative feature improvement practices during development
- Collaborating on scalable workflow design and backend integration concepts

Cybersecurity Workflow Optimization using AWS PartyRock *Link: [CyberShield](#)*

Hack on with Amazon – National Level Hackathon – Oct 2025

- Built an AI-powered cybersecurity workflow solution using AWS PartyRock
- Designed automation workflows to reduce operational workload for CISOs by up to 80%
- Collaborated and lead a 5-member engineering team to develop and present the solution
- Applied cloud deployment concepts, AI-assisted automation, and technical problem-solving under tight timelines
Contributed to solution architecture, workflow optimization, and testing

LEADERSHIP

Student Builder Group Leader – Founder & Lead | MRIT

Link: [CloudClubSite](#)

First and Only Cloud Community in Mandya District

- Founded and leading a technical student community focused on cloud computing, AI, and software engineering
- Organized workshops, coding sessions, and collaborative technical learning initiatives
- Guided students in AWS fundamentals, GitHub workflows, and project-based learning
- Managed technical coordination, developer engagement, and community operations
- Promoted hands-on software development and collaborative engineering culture

GeeksforGeeks Campus Mantri | MRIT

- Organized coding contests and DSA-focused sessions for 200+ students
- Encouraged structured problem-solving and competitive programming practices
- Supported peer learning through technical events and coding activities

ACHIEVEMENTS

Hack on with Amazon – National Level Hackathon | 3rd Place

Link: [Website Shoutout](#)

- Secured 3rd place nationwide among participating teams
- Led a 5-member team to build an AWS-powered AI cybersecurity application
- Presented technical workflows and implementation strategy at the national level

Competitive Coding & Learning Platforms

- Active on HackerRank and LeetCode for problem-solving and coding practice
- Continuously improving software engineering and algorithmic skills through hands-on learning
